The lower limbs (legs) are located on the side of the body and are opposite to each other The legs of each child are on oppo site sides and not on the same side as declared by some Kokomo doctors The genital organs are located on the back between the legs, on either side of junction of the two spinal columns and about three and a half inche apart. They both nurse at the breast and take to the ottle like the trained children. They

DOMESTIC SERVICE.

Work Which Many Girls Consider Not Compatible with Freedom. A servant-girl's work is necessarily nover done. She may be kept up late to bring in supper if her mistress goes to the theater. There are certain persons whom to neet is like opening the window of a close apartment on a delicious June day. The first breath is an inspiration. You throw back your locks from your heated forehead and your weary eyes. and ask nothing but to sit down and let this soothing presence minister to you. All your cares and frets one by one creep away, and a new life and vigor seem infused into every nerve and muscle. You are not th creature that you were ten minutes before. You are ready, after all, to do valiant battle with life, though you had supposed yourself quite sur sities.
